

Bring New Home Visions to Life Using an Exciting, Personalized Visual Experience

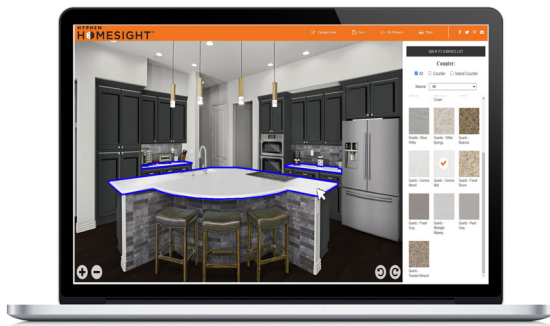

Home Builder Virtual Design Software

Elevate your homebuyers' experience by offering them the power to design their dream homes using Hyphen Solutions' cutting-edge virtual design software, Hyphen HomeSight. Enhance your sales process, boost leads and conversions, and provide an enjoyable, personalized visual journey for your homebuyers. With just one click, they can effortlessly explore options, finishes and customizations.

Convert More Leads to Sales, Faster Than Ever Before

Quickly communicate the availability of finishes and customizations to your leads and prospects, enhancing the effectiveness and productivity of the sales process. This improvement in lead to contract conversions not only boosts profitability but also provides valuable insights into popular styles and trending features.

Digitize Your Design Center, Creating a More Efficient Process

By taking your Design Center online, you can easily update and track which features are presented to your customers including structural options, elevations, exterior and interior finishes, fixtures, flooring and more. This decreases manual employee hours, elevates your buyer's confidence in their selections and helps them budget for more options.

Give Your Homebuyers Customization at Their Fingertips and Increase Your Profitability

By providing all your design options to your homebuyers online, they can see everything you have to offer, on their own time according to their schedule, on a mobile-friendly platform. Giving your prospects the ability to see all your available options and upgrades virtually on their new home increases the chances of them choosing more options, which in turn, is more profitable for the Home Builder.

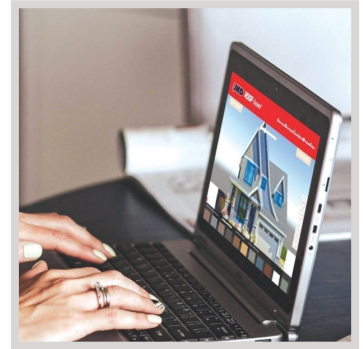

Quick Implementation with Home Builder Industry Software Experts

Hyphen HomeSight's options are customizable as well as the process, to fit your business model. Work closely with our experts to accurately represent your design options and colors. Our implementation takes about 2 to 4 months, allowing you to quickly implement this visual tool into your sales process and start closing more new home contracts.
