# HYPHEN BUILDPRO™

Document Management Module
Real-Time Construction Document Management for Residential Builders

Document Management, a built-in feature of Hyphen Solutions BuildPro, empowers Builders to digitally centralize and organize all construction-related documents on the same platform they use for scheduling.

Construction Document Management

The residential construction sector faces challenges managing numerous documents essential for daily operations. Manual sharing with multiple stakeholders can be time-consuming and error-prone. Centralized document management software addresses these inefficiencies by simplifying access and use.

Streamline the Process

BuildPro's cloud-based system simplifies construction document management, supporting various formats and automating organization. Easy real-time sharing with field and office teams ensures everyone uses the latest files, reducing delay risks. Features like access control and timestamped records enhance security and efficiency.

See the Benefits

The BuildPro single cloud based document management system streamlines the entire construction document management process to ensure everyone is on the same page at the same time.

- ✓ Substantial cost reduction
- ✓ Security
- ✓ Improved accuracy
- ✓ Document tracking
- ✓ Virtual sharing
- ✓ Multiple file formats

Improve the efficiency of your day-to-day operations with Document Management
